

# SEP-1

## Heavy Rail Pistol

Swiss Empire.

Sidearm, Defensive, Unrestricted.

Greetings from the Swiss Empire! We are pleased to announce the release of our latest, the SEP-1 defensive sidearm. Designed with the chaotic nature of After Fall life in mind, the SEP-1 is a lethal combination of the punch necessary to get through the shell of the toughest threat, the power needed to insure they stay down, and has the ammunition capacity to insure that no matter how long you need it, it will always be there to protect you.

Additional features include:

- A full hyper-spectral smartlink targeting system built in.
- SafeHands™ fire control system, insuring it can never be taken and used against you.
- Our renowned At a Glance™ AR status display, keeping your attention where it needs to be.
- Our ultra high velocity 5mm ammunition is compatible with all common rail-gun compatible ammunition modifications.

Name	Armor Penetration	Damage Value	Firing Modes	Ammo
SEP-1	-7	2d10+8	SA	30

### ***TheBrimeCow***

Who the frack are these people? They are spewing the standard hypercorp “we have been your best friend from birth” crap, but no one has ever heard of them.

### ***PortableHawk***

I have no idea... They make good stuff though.

### ***QuarterbackCrab***

This is another sad example of the pro-thumb agenda that is shot throughout all hypercorp propaganda.

### ***BigRedSpot***

They don't tell you that this piece of crap does not have ANY iron sights. if you have not ruined your body with machines, you basically cant use it.

### ***LadyPopsicle***

Aww, go cry grandpa. The rest of us will be here in our morphs, not getting cancer. On topic, I really love the carved out mag well. It makes reloading this in combat a breeze!
